

AMENDMENTS TO THE CLAIMS

This listing of Claims shall replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1-29. (Cancelled)

30. (New) A method of processing data using a portable electronic device, said method comprising:

- accessing first data comprising a web page;
- transcoding, using a processor of said portable electronic device, said first data to generate second data; and
- displaying, using a display device of said portable electronic device, said second data.

31. (New) The method of Claim 30, wherein said displaying further comprises displaying said second data using a browser program, and wherein said transcoding further comprises transcoding said first data using a plug-in associated with said browser program.

32. (New) The method of Claim 30, wherein said first data comprises a plurality of frames, wherein said transcoding further comprises generating a menu associated with said plurality of frames, wherein said menu enables user selection of a particular frame of said plurality of frames, wherein said

transcoding further comprises generating said second data to include a portion of said first data associated with said particular frame, and wherein said displaying further comprises displaying said portion of said first data associated with said particular frame.

33. (New) The method of Claim 30, wherein said web page comprises an image, and wherein said transcoding further comprises reducing a size of said image.

34. (New) The method of Claim 30, wherein said transcoding further comprises reducing said size of said image from a first size to a second size, wherein said second size is less than a resolution of said display device.

35. (New) The method of Claim 30, wherein said web page comprises an image, and wherein said transcoding further comprises reducing a pixel depth of said image.

36. (New) The method of Claim 30, wherein said transcoding further comprises reducing a number of columns of said web page.

37. (New) The method of Claim 30, wherein said transcoding further comprises removing redundant table definition tags to reduce a number of columns of said web page.

38. (New) A portable electronic device comprising:
a processor operable to transcode first data to generate second data,
wherein said first data comprises a web page; and
a display device operable to display said second data.
39. (New) The portable electronic device of Claim 38, wherein said display device is further operable to display said second data using a browser program, and wherein said processor is further operable to transcode said first data using a plug-in associated with said browser program.
40. (New) The portable electronic device of Claim 38, wherein said first data comprises a plurality of frames, wherein said processor is further operable to generate a menu associated with said plurality of frames, wherein said menu enables user selection of a particular frame of said plurality of frames, wherein said processor is further operable to generate said second data to include a portion of said first data associated with said particular frame, and wherein said display device is further operable to display said portion of said first data associated with said particular frame.
41. (New) The portable electronic device of Claim 38, wherein said web page comprises an image, and wherein said processor is further operable to reduce a size of said image.

42. (New) The portable electronic device of Claim 38, wherein said processor is further operable to reduce said size of said image from a first size to a second size, wherein said second size is less than a resolution of said display device.

43. (New) The portable electronic device of Claim 38, wherein said web page comprises an image, and wherein said processor is further operable to reduce a pixel depth of said image.

44. (New) The portable electronic device of Claim 38, wherein said processor is further operable to reduce a number of columns of said web page.

45. (New) The portable electronic device of Claim 38, wherein said processor is further operable to remove redundant table definition tags to reduce a number of columns of said web page.
